## Maintenance Simplified

In the world of industrial maintenance, a reliable and sturdy gasket table is an essential piece of equipment for maintaining and replacing sealing material. Curtiss-Wright's gasket table features solid steel construction that ensures durability and longevity. With six roll holders and seven shelves, this gasket table offers ample storage space for all your gasketing needs. Additionally, the clamp and two swinging arms affixed next to the thick composite top make cutting gasket materials simple and safe. The table's large working space allows for easy access and efficient cutting, and the adjustable feet ensure a level working space wherever the table is installed. Whether you are working on a routine maintenance task or a complex retrofit job, our gasket table is designed to meet the demands of a challenging plant environment.

## Technical Specifications

Property	Specification
