AP STYLE 442

**CURTISS -
WRIGHT**

AP Style 442

AP Services, a product and service brand of Curtiss-Wright, has state-of-the-art gasket manufacturing technology using CNC driven water jet cutters. AP Style 442 is an SBR (Styrene Butadiene Rubber) sheet. Style 442 is the most widely used synthetic rubber. It has good aging, abrasion, and tear resistant properties. Style 442 typically has a smooth plate finish sheet. However, cloth finish is also available.

Red Rubber is good for use in low pressure steam applications, hot and cold water, and air. Avoid using this sheet in oil applications, as it has no oil resistance.

Style 442 is available in sheets, bulk rolls, and pre-cut gaskets.

Other AP Services SBR Rubber Products

AP Style 442A- Premium Grade black SBR sheet with higher tensile strength.

This material can be manufactured in numerous different compounds and durometer ratings. Please call with your specific requirements.

Typical Properties

Temperature Range
-20 °F to +170 °F
Durometer
75 (+/-5) Shore A
Weight
1/8" 10.5 lb./sy.
ASTM Callout
D 2000 ASTM D-1330 Grade II
Thickness
1/16", 3/32", 1/8", 3/16", 1/4"
Sheet Sizes
36" and 48" width (other sizes available upon request)
