AP STYLE 465CI

**CURTISS -
WRIGHT**

AP Style 465CI

AP Services, a product and service brand of Curtiss-Wright, has state-of-the-art gasket manufacturing technology using CNC driven water jet cutters. Style 465CI is an oil resistant neoprene blended sheet reinforced with polyester fabric. It is capable of permitting relative motion between a stationary and a moving member while maintaining a separation of the two media on either side and may maintain a pressure differential between the two media. Style 465CI is a smooth plate finish sheet manufactured from superior components and properties for long service life.

Neoprene Diaphragm rubbers are good for use in oils, gases, and air in gauges, meters, and valves. This material also makes for an excellent weather stripping material.

*It should be carefully assessed for suitability to assure low permeability to the fluids or gases it will separate.

Style 465CI is available in sheets, bulk rolls, and pre-cut gaskets.

This material can be manufactured in numerous different compounds and durometer ratings. Please call with your specific requirements.

Typical Properties

Temperature Range
-20 °F to +170 °F
Durometer
70 (+/-5) Shore A
Weight
1/8" 8.5 lb./sy.
Thickness
1/16", 1/8", 3/16", 1/4"
Sheet Sizes
48" width
